

## **Request for Proposal (RFP)**

**Brief:** Higher Education and Science Landscape Study of South Korea

**Date:** 13 October 2023

### **1 Overview of the British Council**

1.1 The British Council is the UK's international organisation for cultural relations and educational opportunities. We create friendly knowledge and understanding between the people of the UK and other countries. We do this by making a positive contribution to the UK and the countries we work with – changing lives by creating opportunities, building connections and engendering trust.

1.2 We work with over 100 countries across the world in the fields of arts and culture, English language, education and civil society. Each year we reach over 20 million people face-to-face and more than 500 million people online, via broadcasts and publications. Founded in 1934, we are a UK charity governed by Royal Charter and a UK public body

1.3 The British Council employs over 10,500 staff worldwide. It has its headquarters in the UK, with offices in London, Manchester, Belfast, Cardiff and Edinburgh. Further information can be viewed at [www.britishcouncil.org](http://www.britishcouncil.org).

### **2 Introduction and Background to the Project**

The purpose and scope of this RFP and supporting documents is to explain in further detail the requirements of the British Council and the procurement process for submitting a tender proposal.

#### **Background**

For over half a century, the British Council has been a steadfast presence in South Korea, forging connections, understanding, and trust between the people of South Korea and the United Kingdom. This enduring partnership has laid the foundation for a new and promising chapter in our collaboration.

In 2022, the UK government has launched the International Science Partnerships Fund (ISPF), providing new opportunities to foster collaborations between researchers and innovators from the UK and South Korea. To leverage this potential to the fullest, the British Council is commissioning this study to gain a nuanced understanding of the higher education and science landscape in South Korea. This study seeks to lay the evidential groundwork necessary to understand the respective roles and responsibilities and establish a partnership with ministries, funding bodies and delivery partners that addresses shared challenges and capitalises on opportunities for sustainable development, both in the UK and South Korea

in line British Council corporate strategy with particular reference to Pages 19 -20 in the British Council Corporate Plan. A short extract is below:

*Expand academic and scientific collaboration and mobility with the UK As a delivery partner for the new International Science Partnerships Fund, we will work with the Department for Science, Innovation and Technology, UK Research and Innovation, the national academies, and public sector research organisations to deliver collaborative research activities, research capacity strengthening, and inclusion-focused work across seven priority developed economies from spring 2023. We will continue to develop our successful Women in STEM (science, technology, engineering and maths) programme in the Americas, East Asia, South Asia and Wider Europe in 2023–24.*

The primary objective of this study is to delve into the higher education and science ecosystem in South Korea. By doing so, we aim to make informed recommendations to the British Council on how best to forge a fruitful partnership with South Korea in this realm. The study will pinpoint areas of mutual interest where collaboration is not just a possibility, but a priority. Furthermore, it will identify partners committed to engaging actively and substantively in this collaboration.

## **7 Objectives & Deliverables**

### **7.1 Overview**

The objective of the study is to examine the higher education and science landscape in South Korea in order to get a clear perspective of the current priorities and concerns of key local stakeholders and make recommendations to the British Council on how we could effectively partner with South Korea in line with British Council priorities in higher education and science (Refer to [British Council Corporate Plan](#)). The study will outline specific areas of common interest where collaboration is a priority and relevant partners who will be committed to collaborate actively and meaningfully would be identified.

## 7.1 Research objectives and scope

The overall aim of the research is to understand the higher education and science landscape in South Korea in relations to the objectives of the British Council. Within this broad topic, specific objectives and key questions include:

1. Provide a brief understanding and assessment of the state of science, research and innovation and domestic higher education and transnational education (TNE) landscape in South Korea. :

### Science and research: Understanding South Korea's current policies and regarding science and research

- What is the current state of scientific and research infrastructure in South Korea, including funding sources, research institutions, and major projects?
- What is the level of international collaboration in South Korean research, and how does it impact innovation and knowledge exchange?
- What are the key challenges and barriers faced by researchers and innovators in South Korea, such as funding constraints, regulatory hurdles, or talent retention issues?
- Are there disparities in research and innovation across different regions of South Korea, and if so, what factors contribute to these disparities?
- What is the role of the government in fostering a culture of innovation and supporting research and development, and how effective are government policies and initiatives in this regard?

### Higher Education: Understanding the higher education landscape in South Korea

- What are the priority and focus areas of higher education institutions in South Korea?
- Is there a distinction between research intensive and teaching universities?
- What is the current government's view of internationalising the higher education sector in South Korea and what appetite if any for TNE?
- What is the level of internationalisation in South Korean higher education, including the number of international students and partnerships with foreign institutions?
- What is the quality assurance and accreditation framework for South Korean higher education institutions, and how does it impact the overall quality of education?

### Transnational Education: Understanding South Korea's current policies regarding TNE and the scale, format and growth trend of current TNE activity in South Korea

- What forms of TNE are allowed or recognised in South Korea? (For example branch campuses, joint degree programmes, franchised degree courses, distance learning and other programme formats)
  - What are the ongoing requirements that a TNE programme must comply with?
  - What is the scale of different kinds of TNE in the country (including TNE from UK and non-UK providers), and how has this evolved over time?
  - What programme formats, levels of study and subject areas are the most prominent?
  - Are there any differences between TNE in different parts of South Korea or partnerships with different types of institution?
2. Mapping of the ecosystem for science and research by outlining the key funders, priority areas, ways of working and insights into type of funding amounts.
  
  3. Competitor analysis of how other countries strategically partner on science with South Korea, how South Korea's investment in research and development (R&D) compare to other countries, and what are the main areas of R&D expenditure.
  
  4. Recommendation on what the focus of the UK, and particularly the British Council, might be in this space. This should align with British Council's objectives and priorities of HMG in South Korea.

### **7.3 Methodology**

We invite bidders to propose a detailed and effective methodology that best meets our research objectives within the outlined timelines and budget.

We anticipate this research will include both desk research (including reviewing government policies, universities' descriptions of their existing programmes and relevant third-party research) and primary research with government officials, education providers, business partners and other relevant stakeholders. It is possible that some relevant information will only be available in Korean. This should start with a review of existing documentations and research data owned by the British Council and key stakeholders and the Supplier will fill in any gaps.

Where possible, interviews with stakeholders in South Korea should be conducted face-to-face, particularly with government agencies and policy makers. We encourage project teams which include local expertise / researcher(s) from South Korea to assist with arranging / conducting interviews and sourcing / interpreting information and data.

PDF, JPG, PPT, Word and Excel formats can be used for any additional supporting documentation (other formats should not be used without the prior written approval of the British Council).

- Responses should be concise, unambiguous, and should directly address the requirement stated.
- Your tender responses to the tender requirements and pricing will be incorporated into the Contract, as appropriate.

### **13 Clarification Requests**

13.1 All clarification requests should be submitted to [education\\_nea@britishcouncil.org](mailto:education_nea@britishcouncil.org) by the Clarification Deadline, as set out in the Timescales section of this RFP. The British Council is under no obligation to respond to clarification requests received after the Clarification Deadline.

13.2 Any clarification requests should clearly reference the appropriate paragraph in the RFP documentation and, to the extent possible, should be aggregated rather than sent individually.

13.3 The British Council reserves the right to issue any clarification request made by you, and the response, to all potential suppliers unless you expressly require it to be kept confidential at the time the request is made. If the British Council considers the contents of the request not to be confidential, it will inform you and you will have the opportunity to withdraw the clarification query prior to the British Council responding to all potential suppliers.

13.4 The British Council may at any time request further information from potential suppliers to verify or clarify any aspects of their tender response or other information they may have provided. Should you not provide supplementary information or clarifications to the British Council by any deadline notified to you, your tender response may be rejected in full and you may be disqualified from this Procurement Process.

### **14 Evaluation Criteria**

14.1 You will have your tender response evaluated as set out below:

**Stage 1:** Tender responses will be checked to ensure that they have been completed correctly and all necessary information has been provided. Tenders responses correctly completed with all relevant information being provided will proceed to Stage 2. Any tender responses not correctly completed in accordance with the requirements of this RFP and/or containing omissions may be rejected at this point.

Where a tender response is rejected at this point it will automatically be disqualified and will not be further evaluated.

**Stage 2:** The completed Qualification Questionnaire (*if used*) will then be reviewed to confirm that the potential supplier meets all of the qualification criteria set out in the questionnaire. Potential suppliers that meet the qualification criteria will proceed to Stage 3. Potential suppliers that do not meet the qualification criteria set out in the Qualification Questionnaire (*if used*) may be excluded from the Procurement Process at this point. Where a potential supplier is excluded at this point, its tender response will be rejected in full and not evaluated further and the supplier will automatically be disqualified from this Procurement Process.

**Stage 3:** If a bidder succeeds in passing Stages 1 and 2 of the evaluation, then it will have its detailed tender response to the British Council's requirements evaluated in accordance with the evaluation methodology set out below. Information provided as part of Qualification Questionnaire (*if used*) responses may also be verified as part of this stage.

14.2 Award Criteria – Responses from potential suppliers will be assessed to determine the most economically advantages tender using the following criteria and weightings and will be assessed entirely on your response submitted:

Criteria	Weighting
Quality	30%
Methodology and Approach	40%
Commercial	20%
Social Value	10%

14.3 Scoring Model – Tender responses will be subject to an initial review at the start of Stage 3 of the evaluation process. Any tender responses not meeting mandatory requirements or constraints (if any) will be rejected in full at this point and will not be assessed or scored further. Tender responses not so rejected will be scored by an evaluation panel appointed by the British Council for all criteria other than Commercial using the following scoring model:

Points	Interpretation
10	<b>Excellent</b> – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas evidence requested in the level of detail requested. This, therefore, is a detailed excellent response that meets all aspects of the requirement leaving no ambiguity as to whether the bidder can meet the requirement.

<b>7</b>	<b>Good</b> – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas of evidence requested, but contains some trivial omissions in relation to the level of detail requested in terms of either the response or the evidence. This, therefore, is a good response that meets all aspects of the requirement with only a trivial level ambiguity due the bidders failure to provide all information at the level of detail requested.
<b>5</b>	<b>Adequate</b> – Overall the response demonstrates that the bidder meets all areas of the requirement, but not all of the areas of evidence requested have been provided. This, therefore, is an adequate response, but with some limited ambiguity as to whether the bidder can meet the requirement due to the bidder’s failure to provide all of the evidence requested.
<b>3</b>	<b>Poor</b> – The response does not demonstrate that the bidder meets the requirement in one or more areas. This, therefore, is a poor response with significant ambiguity as to whether the bidder can meet the requirement due to the failure by the bidder to show that it meets one or more areas of the requirement.
<b>0</b>	<b>Unacceptable</b> – The response is non-compliant with the requirements of the RFP and/or no response has been provided.

14.4 Commercial Evaluation – Your “Overall Price” (as calculated in accordance with requirements of Annex 3 (Pricing Approach) for the goods and/or services will be evaluated by the evaluation panel for the purposes of the commercial evaluation. Prices must not be subject to any pricing assumptions, qualifications or indexation not provided for explicitly by the British Council as part of the pricing approach. In the event that any prices are expressed as being subject to any pricing assumptions, qualifications or indexation not provided for by the British Council as part of the pricing approach, the British Council may reject the full tender response at this point. The British Council may also reject any tender response where the Overall Price for the goods and/or services is considered by the British Council to be abnormally low following the relevant processes set out under the EU procurement rules. A maximum offer score of 10 will be awarded to the tender response offering the lowest “Overall Price”. Other tender responses will be awarded a mark by application of the following formula: (Lowest Overall Price/Overall Price being evaluated) x 10 (rounded to two decimal places) = commercial score.

14.5 Moderation and application of weightings – The evaluation panel appointed for this procurement will meet to agree and moderate scores for each award criteria. Final scores in terms of a percentage of the overall tender score will be obtained by applying the relevant weighting factors set out as part of the award criteria table above. The percentage scores for each award criteria will be amalgamated to give a percentage score out of 100.

14.6 The winning tender response – The winning tender response shall be the tender response scoring the highest percentage score out of 100 when applying the above evaluation methodology, which is also supported by any required verification evidence (to include, without limitation, any updated information or references relating to any Qualification Question responses) obtained by the Authority relating to any self-certification or other requirements referred to in the Qualification Questionnaire (*if used*). If any verification evidence requested from a supplier, or a relevant third party as may be referred to by the supplier in the Qualification Questionnaire (*if used*) as a party prepared to provide such information, is not provided in accordance with any timescales specified by the British Council and/or any evidence reviewed by the British Council (whose decision shall be final) does not demonstrate compliance with any such requirement, the British Council may reject that tender response in full and disqualify the potential winning supplier from the Procurement Process at that point.
